

The U.S. Trade and Development Agency (USTDA) and the Business Council for International Understanding (BCIU) are pleased to invite you to participate in a

South Africa Renewable Energy Grid
Integration
Business Briefing in Orange Country,
California

featuring the

South Africa Electricity Supply
Commission (ESKOM)

The U.S. Trade and Development Agency (USTDA) will hold a Business Briefing in Los Angeles, California on Friday, November 15, 2013. The event will provide an opportunity for U.S. companies to network with key decision-makers in South Africa's Electricity Supply Commission (ESKOM) and learn about the latest developments and project opportunities in South Africa's energy sector.

USTDA is funding this visit to expose the delegation from ESKOM to U.S. best practices and experiences integrating renewable energy sources into the power grid. The delegation will visit public and private sector entities in Texas, Arizona, California and Colorado.

ESKOM is a South African electricity public utility, established in 1923 by the government of South Africa. The utility is the largest producer of electricity in Africa, is among the top seven utilities in the world in terms of generation capacity and among the top nine in terms of sales. ESKOM operates a number of notable power stations throughout South Africa and the only nuclear power plant in the African continent.

This reception is being organized by the Business Council for International Understanding (BCIU).

To register for this event, please contact Nina Kundra, Senior Director of BCIU at n-kundra@bcIU.org or 212-490-0460.

Date: Friday, November 15, 2013
